ADVANTAGE

ROUND & ROMA PROGRAM PORTFOLIO

SAKATA[®]

Full Circle of Products

Sakata's expanded tomato program has reached new heights, offering all the benefits for you and your customers. Get the advantage with excellent fruit set, uniform shape and size, disease resistance, great color and long shelf-life. If you're looking for a wide range of tomatoes that deliver, well look no further and get the Sakata advantage!

Round

Grand Marshall

Grand Marshall is a vigorous hot set variety with extra-large and large fruit that are firm, deep oblate shaped, on medium strong to strong vigorous determinate plants. Yield potential is high. Pruning is beneficial and at a low to medium level. The deep red fruit have smooth shoulders and perform well for both vine-ripe or for mature green gassing. Grand Marshall has good performance under hot conditions and often when bacterial pressure is present.

Round

Camaro

Camaro produces early maturing, extra-large and firm red globe shaped fruit, on mid-compact determinate plants. Setting and size is good through the plant with final yield potential being high. Due to the plant habit, pruning is either unnecessary or should be low. The deep red fruit have smooth shoulders and perform well for both vine-ripe or for mature green gassing.

Round

Roadster

Roadster is a high quality determinate salad variety featuring a combination of early maturity and extra-large size. Fruit are an attractive red, very firm and smooth-shouldered with good flavor. Suited for both mature green and vine ripe markets. The plants are medium tall and benefit from light pruning. Roadster has a concentrated set and very high yield potential.

Round

Charger

Charger combines TYLCV intermediate resistance and Fol: 1-3 resistance. It shows wide adaptability for Eastern U.S. through Central America for markets requiring extra-large fruit. The plants are medium to tall and benefit from light to no pruning. Charger has good flavor.

Laguna Red

Laguna Red is a high quality determinate salad variety well suited for cool season production. Fruit are an attractive red, are very firm and smooth-shouldered fruit with good flavor. Suited for both mature green and vine ripe markets. The plants are medium tall and benefit from light pruning. Laguna Red has a mid-concentrated set and high quality.

Round

Saladette

Optimax

Optimax is a large to extra-large fruited indeterminate red saladette that has wide adaptability and high maturity. The fruit are oval in shape, uniform, firm, and show a bright red color at maturity. Optimax performs well when growing under conditions from warm to cool and for long cycle production.

Saladette

Supremo

Supremo is a productive hybrid that produces high numbers of uniform extra-large and large fruit. The plants are compact, have a concentrated production period and set well in the heat. The fruit have high quality, are very firm, have nice red color at maturity and great shelf life. Supremo has an impressive disease resistance package.

Salad

Think Pink

Think Pink is a round pink tomato that has a beautiful color with an outstanding smooth taste that is well balanced between acidity and Brix. It has very high yield potential with excellent quality and a high pack-out percentage. The fruit have good shelf life and firmness without sacrificing the unique and delicious flavor.

Rootstock

Bowman

Bowman has a strong disease resistance package and is suited for areas that suffer from Fol: 1-3 or Bacterial Wilt. The bacterial wilt resistance is strong and combines with good plant vigor. It has mid to strong vigor. Bowman has a relatively thick stem making grafting easier and has good general scion to rootstock compatibility.

Saladette

Mariana

Mariana is popular in many NAFTA and Central American markets due to its reliability, versatility and excellent quality. It is well suited for mature green and vine ripe harvesting and performs well on ground and staked culture. The plants are strong, medium compact and produce high yields of smooth extra-large and large, high quality fruit with very good uniformity, firmness and shelf life.

Saladette

Daytona

Daytona is a widely adapted variety with excellent yield potential and quality. Productive medium compact plants produce smooth extralarge fruit, with good color, firmness and shelf life. Daytona is similar to Mariana with the addition of IR: TYLCV: Is.

Saladette

Tachi

Tachi is a productive variety that produces extra-large and large fruit similar to Mariana. The plants are strong, medium in size and set well in the heat. The fruit have high quality, are firm and have good shelf life at maturity. Tachi is adapted for mature green and vine ripe production. Tachi has resistance to root knot nematode and intermediate resistance to TSWV.

Villa

Villa is an extra-large fruited indeterminate variety with extra-large fruit and good quality. Maturity is mid-early. The fruit are blocky oval in shape, uniform, very firm with good color. The plant has short, compact internodes and is suited for short cycle production of XL quality fruit.

Saladette

TOMATO HYBRIDS

Variety	Relative Maturity**	Fruit Characteristics	Disease Resistance	Uses & Remarks
Saladette/Roma Determinate				
Daytona	Mid	Blocky, elongated, uniform, firm, red	HR: Fol: 1, 2 / Mi [^] / Va: 1 / Vd: 1 \\ IR: TYLCV: Is*	Well suited for TYLCV: Is* pressure slots, great fruit quality.
Mariana	Mid-late	Blocky, elongated, very uniform, red	HR: Aal / Fol: 1, 2 / Mi [^] / Va: 1 / Vd: 1 \\ IR: Ss	Good performance under hot set conditions.
Supremo	Early	Blocky elongated, large to XL	HR: Fol: 1-3 / Mi [^] / Pst: 0 / Va: 1 / Vd: 1 \\ IR: TSWV	Very early concentrated productions.
Tachi	Mid-late	Blocky elongated, XL, dark red	HR: Aal / Fol: 1, 2 / Mi [^] / Va: 1 / Vd: 1 \\ IR: TSWV	Very good quality. Extra-large, firm fruit.
Saladette/Roma Indeterminate				
OptiMax	Mid	Elongated oval, large, uniform	HR: Aal / Fol: 1, 2 / Pst: 0 / Va: 1 / Vd: 1	Ideal for hot and cold season.
Villa	Early	Blocky oval, smooth, bright red	HR: Aal / Fol: 1-3 / Va: 1 / Vd: 1 \\ IR: TSWV	Villa shows wide adaptability and is well suited for short cycle production of XL fruit.
Salad/Round Determinate				
Bella Rosa***	Mid-early	Oblate, large to XL, uniform, red	HR: Aal / Fol: 1, 2 / Va: 1 / Vd: 1 \\ IR: Ss / TSWV	Well adapted for Eastern U.S. production.
Camaro	Early	Globe, XL, uniform, red	HR: Aal / Fol: 1-3 / Va: 1 / Vd: 1 \\ IR: Ss / TYLCV: Is*	Very good performance in hot set slots.
Charger	Early to mid-early	Oblate, XL, very firm	HR: Aal / Fol: 1-3 / Va: 1 / Vd: 1 \\ IR: Ss / TYLCV: Is*	Early maturity of extra-large fruits with good flavor.
Grand Marshall	Early	Deep oblate, large to XL, red	HR: Aal / Fol: 1, 2 / Va: 1 / Vd: 1 \\ IR: Ss / TYLCV: Is*	Early maturity for a main season hot set type.
Laguna Red	Mid	Globe, XL, very uniform, red, very firm	HR: Aal / Fol: 1, 2 / For / ToMV: 0, 1 / Va: 1 / Vd: 1 \\ IR: Ss / TYLCV: Is*	Smooth, high quality, very firm, suited for late fall through spring sowing.
Reba	Mid	Deep oblate, large to XL, red	HR: Aal / Fol: 1, 2 / Va: 1 / Vd: 1 \\ IR: Ss	Excellent fruit quality. Superb variety for California production.
Red Pride	Late	Deep Oblate, large to XL, red	HR: Aal / Fol: 1, 2 / Va: 1 / Vd: 1 \\ IR: Ss	Canopy can stand up well under certain foliar disease pressure.
Roadster	Early	Globe, XL, uniform, deep red, very firm	HR: Aal / Fol: 1-3 / For / Va: 1 / Vd: 1 \\ IR: Ss / TSWV	Early with high yield potential, XL size, firmness and good flavor.
Salad/Round Indeterminate				
Think Pink	Mid-early	Round, smooth, pink	HR: Ff: A-E / Fol: 1, 2 / ToMV: 0-2 / Va: 1 / Vd: 1 \\ IR: Mi [^] / Ss	Well balanced and vigorous plant.
Rootstock				
Bowman	Medium	Easy grafter with early mid vigor	HR: Fol: 1-3 / For / ToMV: 0-2 / Va: 1 / Vd: 1, 2 \\ IR: Mi [^] / PI / Rs	For areas with bacterial wilt and fusarium wilt race 3.

Disease terminology: HR = High Resistance, IR = Intermediate Resistance. Disease code: Aal - Alternaria stem canker, Ff - Leaf mold, Fol - Fusarium wilt, For - Fusarium crown and root rot, Mi - Root knot, Pst - Bacterial speck, Ss - Gray leaf spot, ToMV - Tomato mosaic, TSWV - Tomato spotted wilt, TYLCV - Tomato yellow leaf curl, Vd - Verticillium wilt.

* - TYLCV: Is = Tomato yellow leaf curl virus: Israel strain. ** - Days to Relative Maturity are an approximation and may fluctuate due to varying planting times, location and conditions. *** - This hybrid was developed in cooperation with the University of Florida's Food and Agricultural Sciences tomato breeding program. ^ - Soil temperatures above 80.6 °F (27°C) and other stress conditions may cause Mi resistance to break.

DISCLAIMER: Claims and other disclosed information are based on our observations and/or information from other sources. Crop performance depends on the interaction between the genetic potential of the seed, its physiological characteristics, the environment, including management, and other uncontrollable factors that may alter expected performance. Statements on the reaction of varieties to a specific pathogen, pest or stress are based on evaluation under defined conditions. These reactions can be affected by changes in environmental and biological factors, especially new pathogen races, pest biotypes or vectors of disease agents. Therefore, we give no warranty, express or implied, for crop performance relative to the information given; nor do we accept any liability for any loss, direct or consequential, that may arise from any cause. Read all seed package labeling carefully as it contains terms and conditions of sale.
