

Cauliflower **FOCUS**

Snowbowl (Hybrid)

Snowbowl is a mid-early maturing variety with good uniformity and inner wrap. Especially suited for fall to early winter harvest in the Desert Southwest, Snowbowl produces heavy, dome-shaped heads with small air pockets and excellent curd quality.

- Mid-early maturing
- Especially suited for fall to early winter harvest in the Desert Southwest

Variety	Type	Days to Maturity from Transplant*	Plant Habit	Head Characteristics	Curd Cover	Uses & Remarks
Snowbowl	Fresh	65-70	Compact	Domed, heavy	Excellent	Mid-early maturing. Especially suited for fall to early winter harvest in the Desert Southwest.

* Days to Maturity are an approximation and may fluctuate due to varying planting times, location and conditions.

DISCLAIMER: Claims and other disclosed information are based on our observations and/or information from other sources. Crop performance depends on the interaction between the genetic potential of the seed, its physiological characteristics, the environment, including management, and other uncontrollable factors that may alter expected performance. Statements on the reaction of varieties to a specific pathogen, pest or stress are based on evaluation under defined conditions. These reactions can be affected by changes in environmental and biological factors, especially new pathogen races, pest biotypes or vectors of disease agents. Therefore, we give no warranty, express or implied, for crop performance relative to the information given; nor do we accept any liability for any loss, direct or consequential, that may arise from any cause. Read all seed package labeling carefully as it contains terms and conditions of sale.
