

Collard FOCUS

Bunch / Fresh / Processing

Flash (Hybrid)

Due to hybrid uniformity and vigor, Flash offers processors and fresh-market growers an early maturing, highly uniform Vates-type hybrid. The slowest of our collards to bolt, this variety allows growers repeated heavy harvests of leaves.

- Vates type
- Fast regrowth
- Good uniformity

Variety	Type	Days to Maturity from Direct Seed*	Plant Habit	Leaf Characteristics	Bolt Resistance	Uses & Remarks
Flash	Vates	75	Upright, open	Dark green, smooth	Very high	Fast regrowth, good uniformity. Good for stripping, bunching and processing.

⊕ = Open Pollinated. * Days to Maturity are an approximation and may fluctuate due to varying planting times, location and conditions.

DISCLAIMER: Claims and other disclosed information are based on our observations and/or information from other sources. Crop performance depends on the interaction between the genetic potential of the seed, its physiological characteristics, the environment, including management, and other uncontrollable factors that may alter expected performance. Statements on the reaction of varieties to a specific pathogen, pest or stress are based on evaluation under defined conditions. These reactions can be affected by changes in environmental and biological factors, especially new pathogen races, pest biotypes or vectors of disease agents. Therefore, we give no warranty, express or implied, for crop performance relative to the information given; nor do we accept any liability for any loss, direct or consequential, that may arise from any cause. Read all seed package labeling carefully as it contains terms and conditions of sale.
