

Cilantro FOCUS

Baby Leaf

Santo

Santo is fast growing and one of the first slow-bolting varieties introduced. It has broad celery-like leaves, which can be harvested two or more times. This variety is very uniform and good for bunching. Santo is a widely utilized herb variety with strong aroma. Monogerm seed is available. Organic and non-organic seeds are available.

- Fast-growing, slow-bolting strain
- Suitable for multiple harvests
- Use leaves as cilantro and seeds as coriander

Variety	Type	Days to Maturity from Direct Seed*	Leaf Characteristics	Leaf Color	Uses & Remarks
Santo	Baby Leaf (Coriander)	60	Broad, celery-like	Dark green	Fast growing, slow bolting strain, suitable for multiple harvests. Highly aromatic.

☉ = Open Pollinated. * Days to Maturity are an approximation and may fluctuate due to varying planting times, location and conditions.

DISCLAIMER: Claims and other disclosed information are based on our observations and/or information from other sources. Crop performance depends on the interaction between the genetic potential of the seed, its physiological characteristics, the environment, including management, and other uncontrollable factors that may alter expected performance. Statements on the reaction of varieties to a specific pathogen, pest or stress are based on evaluation under defined conditions. These reactions can be affected by changes in environmental and biological factors, especially new pathogen races, pest biotypes or vectors of disease agents. Therefore, we give no warranty, express or implied, for crop performance relative to the information given; nor do we accept any liability for any loss, direct or consequential, that may arise from any cause. Read all seed package labeling carefully as it contains terms and conditions of sale.
