

# Dill FOCUS

Dill / Herbs

## Dukat

Dukat produces much higher yields of foliage than other dill varieties. The dark green, ferny leaves also have distinct, strong aroma that adds depth to any fish, vegetable, or pasta dish. Its vigorous plants eventually reach 30 to 40 inches tall and are topped with very large umbels. Dukat is suitable for summer culture, as well as the typical spring and fall.

- Strong aroma, large umbels
- Suitable for summer culture

Variety	Type	Days to Maturity from Direct Seed*	Leaf Characteristics	Leaf Color	Uses & Remarks
Dukat 	Dill	70	Fern-like	Dark green	Strong aroma, large umbels. Suitable for summer culture.

 = Open Pollinated. \* Days to Maturity are an approximation and may fluctuate due to varying planting times, location and conditions.

DISCLAIMER: Claims and other disclosed information are based on our observations and/or information from other sources. Crop performance depends on the interaction between the genetic potential of the seed, its physiological characteristics, the environment, including management, and other uncontrollable factors that may alter expected performance. Statements on the reaction of varieties to a specific pathogen, pest or stress are based on evaluation under defined conditions. These reactions can be affected by changes in environmental and biological factors, especially new pathogen races, pest biotypes or vectors of disease agents. Therefore, we give no warranty, express or implied, for crop performance relative to the information given; nor do we accept any liability for any loss, direct or consequential, that may arise from any cause. Read all seed package labeling carefully as it contains terms and conditions of sale.
