

Melon FOCUS

Honeydew

Honeybrew (Hybrid)

Honeybrew has been an industry standard for years and a proven value for early and late plantings in major melon production areas. Its features include high yields, good flavor and a strong rind. This melon also has uniform fruit size with better shipping ability than O.P.s and many other hybrids.

- High yielding with a vigorous vine
- Uniform size and maturity
- Industry standard

Variety	Type	Relative Maturity*	Fruit Size / Shape	Rind Characteristics	Interior Characteristics	Disease Resistance	Uses & Remarks
Honeybrew	Honeydew	Mid	5s, 6s & 8s / oval	Smooth, creamy white	Light green firm flesh	HR: Fom: 0, 2 IR: Sf: 1, 2	High yielding, vigorous vine, excellent fruit quality with uniform size and maturity. Good choice for fresh cut. Industry standard.

Disease terminology: HR = High Resistance, IR = Intermediate Resistance. Disease code: Fom - Fusarium wilt, Sf - Powdery mildew.

* Days to Relative Maturity are an approximation and may fluctuate due to varying planting times, location and conditions.

DISCLAIMER: Claims and other disclosed information are based on our observations and/or information from other sources. Crop performance depends on the interaction between the genetic potential of the seed, its physiological characteristics, the environment, including management, and other uncontrollable factors that may alter expected performance. Statements on the reaction of varieties to a specific pathogen, pest or stress are based on evaluation under defined conditions. These reactions can be affected by changes in environmental and biological factors, especially new pathogen races, pest biotypes or vectors of disease agents. Therefore, we give no warranty, express or implied, for crop performance relative to the information given; nor do we accept any liability for any loss, direct or consequential, that may arise from any cause. Read all seed package labeling carefully as it contains terms and conditions of sale.
