

# Pak Choi **FOCUS**

**Canton Dwarf**

## **Toy Choy** (Hybrid)

Toy Choy is a compact hybrid Canton pak choi with thick, broad, milky white petioles and glossy, dark green leaves. It is perfect for home gardeners and specialty growers servicing Asian markets. This variety is tolerant to heat, which makes it well suited for production in summer months. Toy Choy offers early maturity of 30 to 35 days harvest from sowing.

- Harvest early or when bud starts to appear

Variety	Type	Days to Maturity from Direct Seed*	Habit	Head Characteristics	Bolt Resistance	Uses & Remarks
Toy Choy	Canton Dwarf	Extra early / 30-35	Semi-upright	White petiole	Susceptible	Canton dwarf type. Broad, milky white stems and dark green, glossy leaves much more attractive than OP pak choi. As susceptible to bolting as OP so harvest early or when bud starts to appear.

\* Days to Maturity are an approximation and may fluctuate due to varying planting times, location and conditions.

DISCLAIMER: Claims and other disclosed information are based on our observations and/or information from other sources. Crop performance depends on the interaction between the genetic potential of the seed, its physiological characteristics, the environment, including management, and other uncontrollable factors that may alter expected performance. Statements on the reaction of varieties to a specific pathogen, pest or stress are based on evaluation under defined conditions. These reactions can be affected by changes in environmental and biological factors, especially new pathogen races, pest biotypes or vectors of disease agents. Therefore, we give no warranty, express or implied, for crop performance relative to the information given; nor do we accept any liability for any loss, direct or consequential, that may arise from any cause. Read all seed package labeling carefully as it contains terms and conditions of sale.
