

Beet FOCUS

Baby Leaf / Mature

Red Ace (Hybrid)

Red Ace's wide adaptability and high yield potential have made it an industry leader. Red Ace is known for its uniform, smooth top-shaped roots, heavy yields and consistent performance. Organic and non-organic seeds available.

- Widely adapted and uniform
- Organic and non-organic seeds available

Variety	Type	Days to Maturity*	Interior Color / Root Shape	Crown & Tap Root Size	Top Height	Leaf Color	Disease Resistance	Uses & Remarks
Red Ace	Baby Leaf / Mature	20-35 / 80-85	Deep red / top	Small-medium	Medium	Green		An industry standard among processing and fresh markets for its adaptability, refined crowns and tap roots.

Disease terminology: HR = High Resistance, IR = Intermediate Resistance. Disease code: Cb - Cercospora leaf spot, Ptb - Downy mildew, Rs - Rhizoctonia.

* Days to Relative Maturity are an approximation and may fluctuate due to varying planting times, location and conditions.

☉ = Open Pollinated.

DISCLAIMER: Claims and other disclosed information are based on our observations and/or information from other sources. Crop performance depends on the interaction between the genetic potential of the seed, its physiological characteristics, the environment, including management, and other uncontrollable factors that may alter expected performance. Statements on the reaction of varieties to a specific pathogen, pest or stress are based on evaluation under defined conditions. These reactions can be affected by changes in environmental and biological factors, especially new pathogen races, pest biotypes or vectors of disease agents. Therefore, we give no warranty, express or implied, for crop performance relative to the information given; nor do we accept any liability for any loss, direct or consequential, that may arise from any cause. Read all seed package labeling carefully as it contains terms and conditions of sale.
