

Pepper FOCUS

Specialty

Right On Red (Hybrid)

Right on Red is very early maturing and has mid plant vigor with continuous setting ability. The fruit are flat round in shape, smooth, and have thick walls. Right on Red matures from dark green to deep red. This variety is well suited for stuffing and pickling.

- Indoor/Outdoor
- Great companion to Orange You Sweet and Yes To Yellow

Variety	Type	Relative Maturity*	Fruit Size / Shape	Fruit Color	Plant Habit	Disease Resistance	Uses & Remarks
Right On Red	Specialty, Indoor / Outdoor	Very early	Small / flat round	Dark green to deep red	Mid		Suited for stuffing and pickling, blending colors is popular.

Disease terminology: HR = High Resistance, IR = Intermediate Resistance. Disease abbreviation code: Mi - Nematode, Pc - Phytophthora root rot, PMMoV - Pepper mild mottle, PVY - Potato Y, Rs - Bacterial wilt, TEV - Tobacco etch, TMV - Tobacco mosaic, TSWV - Tomato spotted wilt, Xcv - Bacterial spot.

* Days to Relative Maturity are an approximation and may fluctuate due to varying planting times, location and conditions.

DISCLAIMER: Claims and other disclosed information are based on our observations and/or information from other sources. Crop performance depends on the interaction between the genetic potential of the seed, its physiological characteristics, the environment, including management, and other uncontrollable factors that may alter expected performance. Statements on the reaction of varieties to a specific pathogen, pest or stress are based on evaluation under defined conditions. These reactions can be affected by changes in environmental and biological factors, especially new pathogen races, pest biotypes or vectors of disease agents. Therefore, we give no warranty, express or implied, for crop performance relative to the information given; nor do we accept any liability for any loss, direct or consequential, that may arise from any cause. Read all seed package labeling carefully as it contains terms and conditions of sale.
