

# Beet FOCUS

Baby Leaf / Mature

## Vulture (Hybrid)

Vulture is a new variety to our beet collection. It has a half-long cylindrical shape that results in high yields. This variety has dark red, smooth roots with little to no zoning. Vulture has small crowns and small tap roots. In addition, Vulture has good flavor in comparison to other cylindrical beet varieties.

- Half long cylindrical
- Good flavor
- Excellent yields

Variety	Type	Days to Maturity*	Interior Color / Root Shape	Crown & Tap Root Size	Top Height	Leaf Color	Disease Resistance	Uses & Remarks
Vulture	Mature	85-90	Deep red / cylindrical and blocky	Small-medium	Medium	Dark green		New half-long cylindrical roots are perfect for processing, fresh markets and specialty markets.

Disease terminology: HR = High Resistance, IR = Intermediate Resistance. Disease code: Cb - Cercospora leaf spot, Ptb - Downy mildew, Rs - Rhizoctonia.

\* Days to Relative Maturity are an approximation and may fluctuate due to varying planting times, location and conditions.

☉ = Open Pollinated.

DISCLAIMER: Claims and other disclosed information are based on our observations and/or information from other sources. Crop performance depends on the interaction between the genetic potential of the seed, its physiological characteristics, the environment, including management, and other uncontrollable factors that may alter expected performance. Statements on the reaction of varieties to a specific pathogen, pest or stress are based on evaluation under defined conditions. These reactions can be affected by changes in environmental and biological factors, especially new pathogen races, pest biotypes or vectors of disease agents. Therefore, we give no warranty, express or implied, for crop performance relative to the information given; nor do we accept any liability for any loss, direct or consequential, that may arise from any cause. Read all seed package labeling carefully as it contains terms and conditions of sale.
