

Radish **FOCUS**

Bunch

Champion

Champion is a uniform, large, round-oval radish with bright cherry-red color. Vigorous, tall tops with strong attachments, along with roots which are very late to become pithy, lead to greater grower flexibility for time of harvest. Champion is a standard for short-day or cool-season bunching.

- Late to pith
- Strong tops for upland soils

Variety	Type	Days to Maturity from Direct Seed*	Top Length	Root Characteristics	Uses & Remarks
Champion 	Bunch	28	Medium	Globe, bright red	Late to get pithy. Strong tops for upland soils. Performs well for bunching and shipping.

 = Open Pollinated. * Days to Maturity are an approximation and may fluctuate due to varying planting times, location and conditions.

DISCLAIMER: Claims and other disclosed information are based on our observations and/or information from other sources. Crop performance depends on the interaction between the genetic potential of the seed, its physiological characteristics, the environment, including management, and other uncontrollable factors that may alter expected performance. Triploid hybrid watermelon varieties will on occasion produce empty white seed coats or hard, dark undeveloped seeds and, therefore, are not warranted to be completely "seedless". Statements concerning the reaction of varieties to a specific pathogen, pest or stress are based on evaluation under defined conditions. These reactions can be affected by changes in environmental and biological factors, especially new pathogen races, pest biotypes or vectors of disease agents. Therefore, we give no warranty, express or implied, for crop performance relative to the information given; nor do we accept any liability for any loss, direct, indirect, or consequential, that may arise from any cause. Read all seed package labeling carefully to understand the terms and conditions of sale.
