

Tomato FOCUS

Indeterminate Grape

Sweet Million (Hybrid)

Sweet Million is an early maturing, round cherry tomato with an average weight of 10 to 15 grams. The fruit are very uniform. Compared with other varieties of similar habit and sweetness, Sweet Million is less likely to crack and has an improved balanced flavor. It is easy to grow, has strong vigor and produces high yields of firm fruit with an average shelf life. Sweet Million is an excellent home garden or roadside variety offering superb flavor.

- Sweet and very flavorful fruit
- High yield potential
- Classic cherry tomato

Variety	Type	Relative Maturity**	Fruit Characteristics	Disease Resistance	Uses & Remarks
Sweet Million	Indeterminate Cherry	Early	Small, round, red	HR: Fol: 1 / ToMV: 0, 1	Classic cherry with sweet, flavorful fruit.

Disease terminology: HR = High Resistance, IR = Intermediate Resistance. Disease code: Aal - Alternaria stem canker, Ff - Leaf mold, Fol - Fusarium wilt, For - Fusarium crown and root rot, Mi - Root knot, Pst - Bacterial speck, Ss - Gray leaf spot, ToMV - Tomato mosaic, TSWV - Tomato spotted wilt, TYLCV - Tomato yellow leaf curl, Vd - Verticillium wilt.

* - TYLCV: Is = Tomato yellow leaf curl virus: Israel strain. *** - This hybrid was developed in cooperation with the University of Florida's Food and Agricultural Sciences tomato breeding program. ^ - Soil temperatures above 80.6 °F (27°C) and other stress conditions may cause Mi resistance to break.

** Days to Relative Maturity are an approximation and may fluctuate due to varying planting times, location and conditions.

DISCLAIMER: Claims and other disclosed information are based on our observations and/or information from other sources. Crop performance depends on the interaction between the genetic potential of the seed, its physiological characteristics, the environment, including management, and other uncontrollable factors that may alter expected performance. Statements on the reaction of varieties to a specific pathogen, pest or stress are based on evaluation under defined conditions. These reactions can be affected by changes in environmental and biological factors, especially new pathogen races, pest biotypes or vectors of disease agents. Therefore, we give no warranty, express or implied, for crop performance relative to the information given; nor do we accept any liability for any loss, direct or consequential, that may arise from any cause. Read all seed package labeling carefully as it contains terms and conditions of sale.
