

Turnip FOCUS

Multiple Cuttings / Processing

All Top (Hybrid)

This variety is a hybrid developed from Japanese domestic turnip greens. All Top is thick and has tender leaves like the tendergreen type with a well developed root system. It grows well under moderate climate conditions. All Top is best for processing turnip greens and multiple cuttings.

- High yielding with vigorous regrowth

Variety	Type	Days to Relative Maturity*	Root Characteristics	Leaf Characteristics	Bolt Resistance	Uses & Remarks
All Top	Turnip green	35	Tapered	Broad, erect, long petioles	Moderate	High yielding with vigorous regrowth.

⊕ = Open Pollinated. * Days to Relative Maturity are an approximation and may fluctuate due to varying planting times, location and conditions.

DISCLAIMER: Claims and other disclosed information are based on our observations and/or information from other sources. Crop performance depends on the interaction between the genetic potential of the seed, its physiological characteristics, the environment, including management, and other uncontrollable factors that may alter expected performance. Statements on the reaction of varieties to a specific pathogen, pest or stress are based on evaluation under defined conditions. These reactions can be affected by changes in environmental and biological factors, especially new pathogen races, pest biotypes or vectors of disease agents. Therefore, we give no warranty, express or implied, for crop performance relative to the information given; nor do we accept any liability for any loss, direct or consequential, that may arise from any cause. Read all seed package labeling carefully as it contains terms and conditions of sale.
