

Turnip FOCUS

Fresh / Processing

Alamo (Hybrid)

In Texas and the Southeast, this variety has shown excellent results for processors. Alamo yields have been as high as 50% greater than standard varieties due to its vigorous regrowth. Processors like the excellent taste this variety offers. This unique hybrid compares favorably to standard turnip greens, but with much more vigor.

- Excellent yields and regrowth ability

Variety	Type	Days to Relative Maturity*	Root Characteristics	Leaf Characteristics	Bolt Resistance	Uses & Remarks
Alamo	Turnip green	33	Tapered. No root for harvest	Broad, smooth leaves	Moderate	Shows excellent yields and regrowth ability. Mostly used for processing, can be used for fresh market.

☉ = Open Pollinated. * Days to Relative Maturity are an approximation and may fluctuate due to varying planting times, location and conditions.

DISCLAIMER: Claims and other disclosed information are based on our observations and/or information from other sources. Crop performance depends on the interaction between the genetic potential of the seed, its physiological characteristics, the environment, including management, and other uncontrollable factors that may alter expected performance. Statements on the reaction of varieties to a specific pathogen, pest or stress are based on evaluation under defined conditions. These reactions can be affected by changes in environmental and biological factors, especially new pathogen races, pest biotypes or vectors of disease agents. Therefore, we give no warranty, express or implied, for crop performance relative to the information given; nor do we accept any liability for any loss, direct or consequential, that may arise from any cause. Read all seed package labeling carefully as it contains terms and conditions of sale.
