

# Spinach **FOCUS**

**Baby Leaf / Multi**

## Edna (Hybrid)

Edna has nice, dark green, semi-savoy leaves that make it an attractive variety for any baby leaf grower. It is well suited for fall or early spring baby leaf plantings. Edna also has downy mildew resistance that make it adapted for east coast or conventional west coast baby leaf growers.

- Nice dark green leaves
- Moderate growth rate
- R:Pfs:1-10

Variety	Type	Days to Maturity from Direct Seed*	Plant Type / Leaf Shape	Leaf Color	Bolting Resistance	Disease Resistance	Uses & Remarks
Edna	Baby Leaf / Mature	20-25	Semi upright / elongated	Dark green	Moderate	HR: Pfs: 1-10	Adapted for east coast or conventional west coast baby leaf growers.

Disease terminology: HR = High Resistance, IR = Intermediate Resistance. Disease code: Ao - White Rust, Pfs - Downy mildew.

\* Days to Maturity are an approximation and may fluctuate due to varying planting times, location and conditions.

DISCLAIMER: Claims and other disclosed information are based on our observations and/or information from other sources. Crop performance depends on the interaction between the genetic potential of the seed, its physiological characteristics, the environment, including management, and other uncontrollable factors that may alter expected performance. Statements on the reaction of varieties to a specific pathogen, pest or stress are based on evaluation under defined conditions. These reactions can be affected by changes in environmental and biological factors, especially new pathogen races, pest biotypes or vectors of disease agents. Therefore, we give no warranty, express or implied, for crop performance relative to the information given; nor do we accept any liability for any loss, direct or consequential, that may arise from any cause. Read all seed package labeling carefully as it contains terms and conditions of sale.
