Charismatic (Hybrid)
Charismatic is part of a foursome of new watermelons that represent our next generation breeding. Early maturity coupled with firm, crisp flesh make this watermelon an easy choice for growers. Charismatic features strong, vigorous vines and has excellent yield potential. For best results, use a Sakata early pollenizer when growing this variety.

- Early maturing variety with good cold-setting ability
- Tiny pips, very uniform and productive
- 45-count with strong and vigorous vines
- For optimum results, use a Sakata early pollenizer

* Days to Maturity are an approximation and may fluctuate due to varying planting times, location and conditions.

**DISCLAIMER:** Claims and other disclosed information are based on our observations and/or information from other sources. Crop performance depends on the interaction between the genetic potential of the seed, its physiological characteristics, the environment, including management, and other uncontrollable factors that may alter expected performance. Triploid hybrid watermelon varieties will on occasion produce empty white seed coats or hard, dark undeveloped seeds and, therefore, are not warranted to be completely “seedless”. Statements concerning the reaction of varieties to a specific pathogen, pest or stress are based on evaluation under defined conditions. These reactions can be affected by changes in environmental and biological factors, especially new pathogen races, pest biotypes or vectors of disease agents. Therefore, we give no warranty, express or implied, for crop performance relative to the information given; nor do we accept any liability for any loss, direct, indirect, or consequential, that may arise from any cause. Read all seed package labeling carefully to understand the terms and conditions of sale.
