

Tomato FOCUS

Determinate Salad

Grand Marshall (Hybrid)

Grand Marshall is a vigorous hot set variety with extra-large and large fruit that are firm, deep oblate shaped, on medium strong to strong vigorous determinate plants. Yield potential is high. Pruning is beneficial and at a low to medium level. The deep red fruit have smooth shoulders and perform well for both vine-ripe or for mature green gassing. Grand Marshall has good performance under hot conditions and often when bacterial pressure is present.

- Extra firm and good quality
- Early maturity for a main season hot set type
- Strong plant and very good field performance under bacteria pressure

Variety	Type	Relative Maturity**	Fruit Characteristics	Disease Resistance	Uses & Remarks
Grand Marshall	Determinate Salad	Early	Deep oblate, large to XL, red	HR: Aal / Fol: 1, 2 / Va: 1 / Vd: 1 IR: Ss / TYLCV: Is	Early maturity for a main season hot set type.

Disease terminology: HR = High Resistance, IR = Intermediate Resistance. Disease code: Aal - Alternaria stem canker, Ff - Leaf mold, Fol - Fusarium wilt, For - Fusarium crown and root rot, Mi - Root knot, Pst - Bacterial speck, Ss - Gray leaf spot, ToMV - Tomato mosaic, TSWV - Tomato spotted wilt, TYLCV - Tomato yellow leaf curl, Vd - Verticillium wilt.

* - TYLCV: Is = Tomato yellow leaf curl virus: Israel strain. *** - This hybrid was developed in cooperation with the University of Florida's Food and Agricultural Sciences tomato breeding program. ^ - Soil temperatures above 80.6 °F (27°C) and other stress conditions may cause Mi resistance to break.

** Days to Relative Maturity are an approximation and may fluctuate due to varying planting times, location and conditions.

DISCLAIMER: Claims and other disclosed information are based on our observations and/or information from other sources. Crop performance depends on the interaction between the genetic potential of the seed, its physiological characteristics, the environment, including management, and other uncontrollable factors that may alter expected performance. Statements on the reaction of varieties to a specific pathogen, pest or stress are based on evaluation under defined conditions. These reactions can be affected by changes in environmental and biological factors, especially new pathogen races, pest biotypes or vectors of disease agents. Therefore, we give no warranty, express or implied, for crop performance relative to the information given; nor do we accept any liability for any loss, direct or consequential, that may arise from any cause. Read all seed package labeling carefully as it contains terms and conditions of sale.
