

Tomato FOCUS

Indeterminate Grape

Sweet Elite (Hybrid)

Sweet Elite is appreciated for its fruit setting ability – particularly in cooler conditions, where it maintains its good size and shape uniformity. The large fruits, .5 to .75 oz. (15-20 gm.), have an attractive deep red color, very good flavor and show good cracking resistance. Consistently produces high yields (beginning at about 65 days) on strong, indeterminate plants with heavy disease resistance.

- Sets well in cooler conditions
- Consistent high yielder of large fruits

Variety	Type	Relative Maturity**	Fruit Characteristics	Disease Resistance	Uses & Remarks
Sweet Elite	Indeterminate Grape	Mid-early	Oval, large-XL, dark red, very uniform	HR: Ff: A-E / Fol: 1, 2 / ToMV: 0-2 IR: Ss	Sweet Elite has an attractive deep red color with good flavor and cracking resistance.

Disease terminology: HR = High Resistance, IR = Intermediate Resistance. Disease code: Aal - Alternaria stem canker, Ff - Leaf mold, Fol - Fusarium wilt, For - Fusarium crown and root rot, Mi - Root knot, Pst - Bacterial speck, Ss - Gray leaf spot, ToMV - Tomato mosaic, TSWV - Tomato spotted wilt, TYLCV - Tomato yellow leaf curl, Vd - Verticillium wilt.

* - TYLCV: Is = Tomato yellow leaf curl virus: Israel strain. *** - This hybrid was developed in cooperation with the University of Florida's Food and Agricultural Sciences tomato breeding program. ^ - Soil temperatures above 80.6 °F (27°C) and other stress conditions may cause Mi resistance to break.

** Days to Relative Maturity are an approximation and may fluctuate due to varying planting times, location and conditions.

DISCLAIMER: Claims and other disclosed information are based on our observations and/or information from other sources. Crop performance depends on the interaction between the genetic potential of the seed, its physiological characteristics, the environment, including management, and other uncontrollable factors that may alter expected performance. Statements on the reaction of varieties to a specific pathogen, pest or stress are based on evaluation under defined conditions. These reactions can be affected by changes in environmental and biological factors, especially new pathogen races, pest biotypes or vectors of disease agents. Therefore, we give no warranty, express or implied, for crop performance relative to the information given; nor do we accept any liability for any loss, direct or consequential, that may arise from any cause. Read all seed package labeling carefully as it contains terms and conditions of sale.
