

Radish FOCUS

Specialty

Starburst

Starburst is a watermelon-type radish, characterized by a bright red interior and a white/green exterior. Expect maturity in about 60 days, depending on day length and temperatures. Performance will be best in most areas if seeds are planted in early spring or fall. Mature roots are tangerine sized with upright bright green foliage. Use to dress up salads or slaws or pickle them to preserve.

- Beautiful bright red interior
- Early spring or fall crop
- Ideal for specialty markets

Variety	Type	Days to Maturity from Direct Seed*	Top Length	Root Characteristics	Uses & Remarks
Starburst	Specialty	60	Upright	Flat round, rosy pink to bright red	Beautiful bright red interior. Early spring or fall crop.

☉ = Open Pollinated. * Days to Maturity are an approximation and may fluctuate due to varying planting times, location and conditions.

DISCLAIMER: Claims and other disclosed information are based on our observations and/or information from other sources. Crop performance depends on the interaction between the genetic potential of the seed, its physiological characteristics, the environment, including management, and other uncontrollable factors that may alter expected performance. Statements on the reaction of varieties to a specific pathogen, pest or stress are based on evaluation under defined conditions. These reactions can be affected by changes in environmental and biological factors, especially new pathogen races, pest biotypes or vectors of disease agents. Therefore, we give no warranty, express or implied, for crop performance relative to the information given; nor do we accept any liability for any loss, direct or consequential, that may arise from any cause. Read all seed package labeling carefully as it contains terms and conditions of sale.
