**Indeterminate Saladette**

## Cedro (Hybrid)

Cedro is a large to extra-large fruited indeterminate red saladette that has high fruit quality, well suited for the export markets. The maturity is mid. The fruit are oval in shape, uniform, firm, and have a bright red color at maturity. The plant has short internodes, mid vigor and yield potential of export quality fruit. Cedro performs well when growing under conditions from warm to cool with good heat set ability. Suited for mid and long cycle production.

- Easy to manage plant
- Ideal for hot and cold season
- Export quality fruit with great firmness and uniform color up

Variety	Type	Relative Maturity**	Fruit Characteristics	Disease Resistance	Uses & Remarks
Cedro	Indeterminate Saladette	Mid	Oval, large to XL, firm	HR: Aal / Fol: 1-3 / ToMV: 0-2 / Va: 1 / Vd: 1	Cedro performs well when growing under conditions from warm to cool with good heat set ability.

Disease terminology: HR = High Resistance, IR = Intermediate Resistance. Disease code: Aal - Alternaria stem canker, Ff - Leaf mold, Fol - Fusarium wilt, For - Fusarium crown and root rot, Mi - Root knot, Pst - Bacterial speck, Ss - Gray leaf spot, ToMV - Tomato mosaic, TSWV - Tomato spotted wilt, TYLCV - Tomato yellow leaf curl, Vd - Verticillium wilt.

\* - TYLCV: Is = Tomato yellow leaf curl virus: Israel strain. \*\*\* - This hybrid was developed in cooperation with the University of Florida's Food and Agricultural Sciences tomato breeding program. ^ - Soil temperatures above 80.6 °F (27°C) and other stress conditions may cause Mi resistance to break.

\*\* Days to Relative Maturity are an approximation and may fluctuate due to varying planting times, location and conditions.

DISCLAIMER: Claims and other disclosed information are based on our observations and/or information from other sources. Crop performance depends on the interaction between the genetic potential of the seed, its physiological characteristics, the environment, including management, and other uncontrollable factors that may alter expected performance. Statements on the reaction of varieties to a specific pathogen, pest or stress are based on evaluation under defined conditions. These reactions can be affected by changes in environmental and biological factors, especially new pathogen races, pest biotypes or vectors of disease agents. Therefore, we give no warranty, express or implied, for crop performance relative to the information given; nor do we accept any liability for any loss, direct or consequential, that may arise from any cause. Read all seed package labeling carefully as it contains terms and conditions of sale.
