# Crunchy Royale

Radish – Round Red

Crunchy Royale is a dark red, round radish ideal for bunching or cello pack. It yields high quality and extremely uniform roots. Overall, Crunchy Royale offers excellent internal and external color and a high pack-out rate for growers.

- Excellent uniformity
- Grows well under cool conditions
- Tolerant to pith

Radish – Round Red

## Crunchy King

This variety has excellent shape and uniformity. It has bright white interior with attractive dark red skin and is mid-early maturing. Crunchy King holds its round shape and does well all season, but it is strongest in fall and spring slots. It has very high recovery and is slow to pith.

- Mid-early maturity
- Mid top height
- Slow to pith, great internal quality
- Excellent uniformity
- Uses: Multi-purpose bunch or cello

Radish – Round Red

## Cherriette

Cherriette is a warm season radish used in the fall and spring in most areas. It has a bright red color and short tops. This variety is uniform and slow to develop pith. Cherriette performs well under warmer conditions and yields better than O.P.s in its class.

- Short top type, very uniform size and shape
- Grows well in warm regions
- Tolerant to pith

Radish – Round Red

## Fireball

Fireball offers excellent dark red roots with uniform tops. Yield potential is much greater with Fireball because of its hybrid uniformity.

- Performs well in warm weather
- Hybrid uniformity

# RADISH AT-A-GLANCE

Variety	Days to Maturity from Direct Seed*	Top Length	Root Characteristics	Uses & Remarks
French Breakfast 	22-23	Medium	Oblong, scarlet with white tip	Excellent for home garden. Delicate flavor.
Cherriette	23	3"	Globe, cherry red	Short top type for bunch or cello. Grows well in warm regions. Very uniform size and shape.
Crunchy King	24	Medium	Round, scarlet red	Crunchy King holds its round shape and does well all season, but it is strongest in fall and spring slots.
Crunchy Red	25	Medium-tall	Round to globe, scarlet red, medium-large	Can get large sized roots without pith in cool weather. Excellent for bunching.
Crunchy Royale	25	Medium-tall	Round, dark red	Excellent uniformity with nice exterior color. Grows well under cool conditions. Bunch or cello type with high pack-out.
Fireball	25	Medium-tall	Round, dark red	Performs well in warm weather. Hybrid uniformity.
Winner	26-28	Medium-tall	Round, dark red	Strong, tall tops, best for bunching. Performs well under short days and cool weather. Superior field uniformity.
Crunchy Crimson	27-28	Medium-tall	Round, dark red, medium-large	Vigorous top under cool condition. High yields with good uniformity.
Champion 	28	Medium	Globe, bright red	Late to get pithy. Strong tops for upland soils. Performs well for bunching and shipping.
Easter Egg II 	28	Tall	Round, shades of red, purple and white	Delightful colors and delicate flavor. Offers six shades of red, purple and white. Home garden and specialty bunch.
Icicle Short Top 	29	Tall	Elongated tapered, white	Mild flavor. Popular for both home garden and fresh market.
Stargazer 	55-60	Medium-tall	Elongated tapered, rosy pink	Upright bright green tops with strong attachment. Can be used as a delicious addition to salads, or for slaw or pickling.

 = Open Pollinated. \* Days to Maturity are an approximation and may fluctuate due to varying planting times, location and conditions.

DISCLAIMER: Any representations and other information are based on our observations and/or information from other sources. Crop performance depends on the interaction between the genetic potential of the seed, its physiological characteristics, the environment, including management, and other uncontrollable factors that may alter expected performance. Triploid hybrid watermelon varieties will on occasion produce white and hard, dark vestigial seed coats and, therefore, are not warranted to be completely "seedless". Statements concerning the reaction of varieties to a specific pathogen, pest or stress are based on evaluation under defined conditions. These reactions can be affected by changes in environmental and biological factors, especially new pathogen races, pest biotypes or vectors of disease agents.
