

REACHING NEW HEIGHTS

Elevated Performance with New Genetics

EXCELLENT YIELD POTENTIAL • DARKER CRIMSON SWEET RIND PATTERN
FIRM, DEEP RED FLESH • SMALL PIP SIZE

EL CAPITAN

El Capitan is an exciting, new triploid watermelon with an attractive, darker Crimson Sweet rind pattern. This variety has shown excellent yield potential for growers, as well as extended shipping and field holding ability. The uniform, blocky-shaped fruit on vigorous vines also feature numerous consumer benefits including deep red, firm flesh, small pip size and outstanding flavor.

Lil Cap is a new triploid watermelon that has excellent yield potential for growers. It features a darker Crimson Sweet attractive rind pattern with a deep red flesh with a very small pip size. This variety is very uniform in fruit size and is a round oval shape. We are excited to introduce the newest variety to our watermelon portfolio!

LIL CAP

NEW

MIRAMONTE

Our ground-breaking breeding keeps getting stronger with the latest addition to the New Horizon Collection: Miramonte. Our newest watermelon has proven to be an excellent main-season variety with strong vigorous vines and predominantly 45 and 36 count fruit. With its deep red, firm flesh, and excellent flavor, Miramonte is sure to be a consumer favorite!

SIERRA NEVADA

Our new triploid collection continues with Sierra Nevada! Sierra Nevada can be best characterized by features including an attractive, darker Crimson Sweet rind pattern, uniform, blocky fruit and vigorous vines. Benefits of this variety include excellent yield potential, extended shipping and field holding potential and firm flesh, making it a great choice for the fresh-cut market.

WATERMELONS AT-A-GLANCE

| VARIETY | TYPE | RELATIVE MATURITY | SIZE / SHAPE | RIND CHARACTERISTICS | INTERIOR COLOR | DISEASE RESISTANCE | USES & REMARKS |
|---|------------------------------|----------------------|------------------------|--|----------------|-----------------------|---|
| SSX8585 | Allsweet | Mid | 18-22 lb / Round oval | Light green background with dark green stripes | Bright red | HR: Co: 1 / Fon: 1 | High yields, black seeded. |
| Belmont | Crimson Sweet / Mini | Mid | 6-10 lb / Round oval | Medium green background with dark green stripes | Deep red | IR: Co:1 IR: Fon:1 | Extremely firm flesh. Small pips, very uniform and productive. For optimum results, use a Sakata early pollinizer. |
| El Capitan  | Crimson Sweet | Early-mid | 16-20 lb / Blocky oval | Wide, very dark stripes on a medium green background | Deep red flesh | HR: Fon: 0, 1 | Very firm flesh with good potential for the fresh-cut market. |
| Lil Cap  | Crimson Sweet | Mid | 8-14 lbs / Round oval | Wide, very dark green stripes on medium green background | Deep red | IR: Fon: 0, 1 | Ideal variety for grafting on wild watermelon rootstock. |
| Miramonte  | Crimson Sweet | Mid-late | 16-20 lb / Blocky oval | Wide, very dark green stripes on medium green background | Deep red | HR: Fon: 0, 1 | Includes a deep red, firm flesh, small pip size and excellent flavor. |
| Preakness | Crimson Sweet | Early-mid | 6s and 8s / Round oval | Wide dark green stripes on medium green background | Deep red flesh | | Early and high yield. |
| Sierra Madre  | Crimson Sweet | Mid | 16-20 lb / Blocky oval | Wide, very dark stripes on a medium green background | Deep red flesh | HR: Fon: 0, 1 | Benefits of this variety include extended shipping and field holding ability, excellent yield potential and fresh-cut market potential. |
| Sierra Nevada  | Crimson Sweet | Mid | 17-21 lb / Blocky oval | Wide, very dark stripes on a medium green background | Deep red flesh | HR: Fon: 0, 1 | It can be best characterized by features including an attractive darker Crimson Sweet rind pattern, uniform, blocky fruit and vigorous vines. |
| Yellow Buttercup | Jubilee | Mid-late | 14-16 lb / Round oval | Light green background with narrow dark green stripes | Bright yellow | | A highly regarded yellow flesh variety. High yields. Dense flesh. |
| Safari  | Allsweet/Pollinizer | Early | Blocky elongated | Dark green background with light green stripes | Deep red | IR: Fon: 0,1 / Co:1 | Strong rind makes it an ideal variety for national and international shipping. |
| Ace | Pollinizer / Non-Harvestable | | Round oval | Light green background with medium green vein stripes | Red | | Blooms early and profusely, providing an abundance of pollen over a more extended period, as compared to competitor pollinizers. |
| Joker | Pollinizer / Non-Harvestable | | Mini oval | Light green background with medium green stripes | Light yellow | IR: Fon: 0-2 / Co: 1 | High germination rate; can be used as watermelon rootstock. |
| Wild Card Plus | Pollinizer / Non-Harvestable | | Round oval | Light green background with narrow stripes | Yellow | | Early pollen source - Non-harvestable. For use with seedless production. |
| Eclipse | Sugar Baby | Mid | 10-20 lb / Round oval | Black green background, smooth | Red flesh | | Early maturity, at around 80 days after transplant. |
| VARIETY | TYPE | GRAFTING | UNIFORMITY | USES & REMARKS | | | |
| Routpower | Rootstock | High vigor rootstock | Excellent | Routpower has a strong root system in the field, providing high resistance to Fusarium wilt, and a stronger plant in stressed conditions, preserving the taste qualities of the fruit. | | | |

Disease terminology: HR = High Resistance, IR = Intermediate Resistance.
Disease code: Co - Anthracnose, Fon - Fusarium Wilt, Sf - Powdery Mildew.

PASSION in Seed

DISCLAIMER: Claims and other disclosed information are based on our observations and/or information from other sources. Crop performance depends on the interaction between the genetic potential of the seed, its physiological characteristics, the environment, including management, and other uncontrollable factors that may alter expected performance. Triploid hybrid watermelon varieties will on occasion produce empty white seed coats or hard, dark undeveloped seeds and, therefore, are not warranted to be completely "seedless". Statements concerning the reaction of varieties to a specific pathogen, pest or stress are based on evaluation under defined conditions. These reactions can be affected by changes in environmental and biological factors, especially new pathogen races, pest biotypes or vectors of disease agents. Therefore, we give no warranty, express or implied, for crop performance relative to the information given; nor do we accept any liability for any loss, direct, indirect, or consequential, that may arise from any cause. Read all seed package labeling carefully to understand the terms and conditions of sale.
